

## HERMES

### TECHNICAL DETAILS

Colour	White
Material	PMMA (Plexiglass)
Countertop	High Pressure Laminate
Diameter [cm]	60
Height [cm]	110

### PRODUCT DESCRIPTION

HERMES is an unconventional bar table with a base made of acrylic glass (plexiglass) and a round countertop made of resistant HPL laminate. The trapezoidal base is distinguished by the possibility of changing the color thanks to the internally built-in LED bulb. Along with the HERMES bar table, the set comes with remote control and charger, thanks to which the user can freely control the colors of the light bulb from the RGB palette. The 60-cm table countertop mounted on the base is available in white color. The height of the HERMES table reaches 110 centimeters. TRENDÉE furniture rental encourages you to rent an unusual HERMES bar table!
